

Professional collaboration

Tecnosida is an Italian SME, our core business is designing, projecting and realizing **technological plants for air pollution control**. We have a **forty years track record**, with thousands of successful installations for customers of any dimension, from SME to multinational corporations, in the following fields:

- *chemicals, paints, polymers, plastics, rubbers*
- *tobacco*
- *food and food processing*
- *paper, leather and textiles*
- *mechanical and metal machining*
- *foundry*
- *renewable energy*
- *waste and recycling*

If you feel interested in having more information or understanding how to become our **partner** and **cooperate with us** in marketing and selling these products on your market, just write us some lines and tell us your idea. Thank you.
